PURCHASED GAS ADJUSTMENT CLAUSE

PROVISION FOR PURCHASED GAS ADJUSTMENT

The applicable Purchased Gas Adjustment (PGA) shall be applied to each 1,000 cubic feet of gas (Mcf) supplied under Rate Schedules GS, RS, IS, RTS and STS of this Tariff. Rates for gas service under Rate Schedule AFDS shall not be subject to the Purchased Gas Adjustment and quantities of gas sold under Rate Schedule AFDS shall be excluded from the cost of purchased gas and related calculations set forth herein.

COMPUTATION OF PURCHASED GAS COMMODITY COSTS PER MCF

The Purchased Gas Commodity Costs (PGCC), per Mcf, shall be computed quarterly to the nearest one-hundredth of a cent (0.01¢), in accordance with the formula set forth below:

$$PGCC = [(CC \div CS) + CE] + \text{Gas Cost Uncollectibles Charge}$$

In computing the PGCC, per Mcf, pursuant to the formula above, the following definitions shall apply:

“CC” – the estimated current commodity cost of gas, which shall be equal to the sum of the following:

1. The projected normalized purchase volumes for the twelve (12) month period beginning with the effective date of the PGA multiplied by the weighted average commodity cost of gas. (The weighted average commodity cost of gas is calculated based on the projected rates and volumes for the quarter beginning with the effective date of the PGA); plus
2. Carrying costs on prepaid gas based on the determination period average balance times the currently authorized rate of return plus an allowance for income taxes.

“CS” – total Mcf sales for the projected normalized twelve month period less Sales under Rate Schedule AFDS.

“CE” – the commodity Actual Cost Adjustment. (For computation see section entitled “Actual Cost Adjustment”).

“Gas Cost Uncollectibles Charge” – calculated to reflect the unbundling of uncollectibles related to gas costs pursuant to the terms of the approved settlement in Case No. 9159. The charge is calculated by multiplying the CC times 1.63%.
