COLUMBIA GAS OF KENTUCKY
PIPELINE RELOCATION

CLAYS MILL ROAD
Lexington, KY

TRAFFIC IMPACTS
The project could result in temporary traffic restrictions or delays during working hours, although we will do our best to minimize disruptions. We also will work to maintain continued access to businesses, churches, schools and homes in the construction area.

WORK ZONE SAFETY
We encourage all pedestrians and motorists traveling through work zones to exercise caution, reduce speed and obey flaggers and signs in the construction zone. Please note that a secured staging area, where supplies for the project will be stored, will be set up behind True Hope Church, located at the corner of Clays Mill Road and Hill N' Dale Road.

OUR TEAM
Columbia Gas will work with our contractor, Stanley Pipeline to complete this project. All employees and contractors can be identified by marked vehicles and also carry photo identification.

CONTACTS
Columbia Gas of Kentucky Pipeline Relocation Hotline 859-288-6355 or 1-800-562-6355, Option 3, Ext. 6355.

PROJECT UPDATES
Follow us on Facebook and Twitter and check our website, ColumbiaGasKY.com, for project updates.

PLEASE PARDON OUR MESS

As part of the Lexington-Fayette Urban County Government plan to widen Clays Mill Road, Columbia Gas is required to relocate a portion of our existing natural gas distribution system in your neighborhood. Please be prepared for digging and disruptions as we complete this work.

While this work is mandated, the installation of approximately 12,525 feet of state-of-the-art pipe will enhance the safety and reliability of natural gas service, will require less future maintenance work and for some customers will support amenities like fire pits, outdoor grills and pool heaters.

The work area for this project will stretch from Waco Road to Stratford Drive as shown on the map below.

Timing: Construction is expected to start in February. To complete this project as efficiently as possible, our crews plan to work Monday through Saturday between 7:30 am and 6:30 pm. In some instances, evening and weekend work may occur to accommodate customer appointments or project deadlines and to alleviate traffic congestion.

Service Impacts: Some Columbia Gas customers in the immediate construction area may experience brief service interruptions as new house lines are installed and if we need to move your meter. We will communicate with and work with those customers to coordinate this work.

Always Call 811 to have utilities marked before digging.
If you smell natural gas, get to a safe place, call 911, and then call our emergency line, 1-800-432-9515.
